## add an extra layer of protection

No one plans for things like chronic illness, accidents or hospital stays. But you can add a supplemental coverage plan to protect yourself from out-of-pocket costs. Plans are affordable, and help you keep more money in your pocket when you have unexpected medical bills.

### How supplemental coverage works

Let's say you chose a short term medical policy with a \$5,000 deductible. Then, you need emergency care, and have a \$12,900 medical bill. You would typically pay \$5,000 out-of-pocket, or whatever remains on your deductible.

But if you have a supplemental plan with a \$250 deductible, your plan would pay \$4,750. Or, 98% of your medical plan's deductible. Either way, you're only paying \$250 out-of-pocket.

### Affordable plans for:

Accidental injuries

Critical illness

Cancer and heart/stroke

Hospital stays

Be sure to check your policy carefully to make sure you are aware of any exclusions or limitations regarding coverage of pre-existing conditions or health benefits (such as hospitalization, emergency services, maternity care, preventive care, prescription drugs, and mental health and substance use disorder services). If this coverage expires or you lose eligibility for this coverage, you might have to wait until an open enrollment period to get other health insurance coverage.
